SUMMARY

Analytical and detail-oriented Computer Science graduate with professional experience in operations, workforce management, and data reporting. Proven expertise in operational reporting, pipeline trend monitoring, data validation, and cross-functional stakeholder coordination. Combines a background in data tracking with practical project experience in end-to-end data analysis, Power BI dashboard automation, data cleansing, and Microsoft Fabric pipelines to translate complex datasets into actionable sales and operational insights. Eager to contribute data-driven problem-solving and operational excellence to drive sales enablement and performance visibility.

TECHNICAL PROFICIENCY

BI & Reporting: Power BI Desktop (Dashboard Creation, Interactive Visualization, DAX, Power Query)

Data Architecture & Automation: Microsoft Fabric (OneLake), Medallion Architecture, Dataflows (Gen2), Data Pipelines (ETL Automation)

Data Management & Cleansing: Advanced Microsoft Excel (VLOOKUP, XLOOKUP, Pivot Tables, Data Validation, De-duplication, Conditional Formatting), SQL (Queries, Joins, Aggregations, CTEs)

Core Competencies: Sales & Pipeline Analytics, SLA-Driven Reporting Operations, Data Quality & Hygiene, Cross-Functional Stakeholder Communication, Trend Identification

KEY PROJECTS

Supply Chain & Procurement Analytics Dashboard | Microsoft Fabric, Dataflows, Pipelines, Power BI | GithubLink

Engineered an end-to-end data analytics and reporting solution using Microsoft Fabric Dataflows and Pipelines within a Medallion Architecture data model to streamline data integration and automate workflows.

Developed interactive Power BI dashboards and tracked SLA-driven operational performance, uncovering key findings: Safety Supplies drove the highest spend-target gap at 11.3M, and Delhivery B2B achieved a 91.0% OTD rate with the lowest freight cost and fastest transit times.

Online Retail Sales Analysis | SQL Server, Power BI, DAX, Power Query | GithubLink

Designed an end-to-end sales analysis workflow using the UCI retail dataset to evaluate performance and customer trends.

Cleaned and modelled multi-thousand-row relational tables using Power Query and SQL Server to ensure data integrity.

Built interactive Power BI dashboards with custom DAX measures, uncovering that top-performing categories drove over 35% of revenue while tracking a 10% order cancellation rate.

PROFESSIONAL EXPERIENCE

Ernst & Young (EY) —Associate, Workforce Management. *September2024–June 2026*

Managed operational resource allocations by aligning workforce availability with project demands, monitoring utilization rates, and executing data validation checks to maintain high data hygiene standards.

Prepared, and shared weekly operational workforce status reports and capacity metrics using Microsoft Excel within strict SLAs.

Coordinated proactively across cross-functional teams and stakeholders to communicate updates, resolve allocation discrepancies, and ensure process alignment.

EDUCATION

Bachelor of Science Computer Science,
University of Calicut,
St. Joseph College Devagiri (2021-2024) Kozhikode, Kerala
