Hiring Team

WIPRO

Bangalore, India

Subject: Application for Analyst L1 Role

Dear Hiring Team,

I am writing to express my enthusiastic interest in the Analyst L1 position at WIPRO. As a Computer Science graduate with hands-on professional experience in operational data reporting, validation, and analytics at Ernst & Young (EY), I am eager to bring my technical skill set and passion for data-driven problem-solving to your team.

Throughout my professional and academic background, I have developed a strong foundation in gathering, cleaning, and structuring multi-source datasets to ensure high data accuracy and consistency. At EY, I managed operational workforce data, executed rigorous data validation checks to uphold data hygiene standards, and delivered weekly reporting insights to support management decision-making.

In addition to my operational experience, I have built end-to-end analytics projects using modern data stacks:

- **Supply Chain Analytics Platform:** Engineered an automated data solution utilizing Microsoft Fabric (Dataflows, Pipelines, and Medallion Architecture) integrated with Power BI dashboards to track operational KPIs and surface key business insights.
- **Online Retail Sales Analysis:** Designed relational data models using SQL Server and Power Query, leveraging custom DAX measures in Power BI to uncover revenue trends and customer patterns.

I thrive in collaborative environments and am comfortable working both independently and alongside cross-functional teams to translate complex business requirements into clear, actionable visualizations. I am excited about the opportunity to contribute my technical capabilities in Excel, SQL, and Power BI to help WIPRO make informed, strategic decisions.

Thank you for your time and consideration. I look forward to the possibility of discussing how my background aligns with your analytical needs.

Sincerely,

Shanil Dev V
